What is Chronic Care Management?

- **Personalized Plans** – We help you set goals and create a plan tailored to your needs.
- **Ongoing Support** – Connect with your care manager between visits for updates and encouragement.
- **Medication Assistance** – We'll help you stay organized and on track with your prescriptions.
- **Care Coordination** – Your CCM team helps communicate between your doctors, specialists, and pharmacy.
- **Better Outcomes** – With consistent guidance, you can manage your conditions more confidently.
- **Improved Collaboration** – CCM works to ensure that important parties are notified of new diagnoses, medications and planned workups.

How the Program Supports You

Our Care Management team partners with you and your provider to deliver personalized, goal-driven support between appointments. Through monthly phone check-ins and coordinated communication, we help you take proactive steps toward better health — without the need for extra office visits.

Program Cost

CCM was created to help patients receive ongoing support — **without extra office visits or unexpected costs**. We bill Medicare only in months when 20 minutes or more of care are provided. If your care requires less time, **no charge is submitted**. For most patients, the out-of-pocket cost is small — **usually \$8–\$15 per month** — and many Medicare Advantage plans cover this completely.

We believe ongoing care should be accessible, affordable, and always worth your while.
